## About

I invented inline stripe fashion showing the stripes on the necktie knot, necktie, suit lapels, and suit running the same direction.

BRANDS WORKED WITH

ERIC GLENNIE APPAREL DESIGNS

## Experience

### FASHION DESIGNER/ INVENTOR

ERIC GLENNIE APPAREL DESIGNS | Jun 2009 - Now

I invented and U. S patented the inline stripe necktie. A fashion first look showing the vertical, diagonal, and horizontal stripes in the necktie knot and necktie running inline, or the same direction. Over the years, I also invented the inline stripe suit showing the stripes in the suit lapels and suit running the same direction too. The inline stripe neckties along with the cohesive and complimentary inline stripe suits can launch a fashion brand that is unique, wearable, distinctive amongst other designers, and a great launching point for the next brand in American and Global, men's and women's businesswear and casual businesswear. I am open to partner with an existing brand and work out a licensing agreement, too.

## Education & Training

1991

### Augsburg College

Bachelor of Arts,

1986

### International

High School Diploma,
