JACQUEMUS | Jul 2022 - Now

I have worked with the brand since July 2022; in the beginning, I worked with them in their office in Paris then I started to take missions from the retail and the visual merchandising team.

My work is basically to prepare their documents for the production companies to start producing their work. I worked on projects like pop up, corners, and showrooms. I draw the technical and 3D for the spaces, their displays, and furniture. Finding materials is also part of my job.
