About

I'm a motivated digital designer currently based in Gateshead. After studying Graphic Design for 5 years and working as a digital designer for over a year, I have been able to try out different aspects of design and have been able to learn many new skills. I am a hardworking, honest person who works well within a team and as an individual. I have strong communication skills that allow me to relay information to my team and clients. I am confident when it comes to working with design technology as I have developed a proficiency in the Adobe Creative Suite inc. Adobe XD, Illustrator and Photoshop as well as figma. I also have a strong understanding of both HTML and CSS and a working knowledge of JavaScript which allows me the ability to mockup more complex sections of designs if needed as well as work with and give more constructive feedback to Developers. My experience in design is wide-ranging, this includes Website Design including UX and UI, Full Brand Re-Designs, Logo Design, Online Magazines, Food & Beverage Menus, Decals and Office Signage. You can view my portfolio here:
