## About

Fashion designer studying Fashion Design and development at UAL London College of Fashion. Fashion Design is, and always will be escapism to freely self express my artistic liberty. I use this prerogative in my professional work and studies by exploring concepts which inspire my work. I am determined to acquire professional, practical and creative knowledge from industry specialists that can enhance my journey on becoming a fashion designer. I am looking for roles that will enhance my conceptual designing skills further and to develop my technical skills both physically and digitally.
