About

After a bachelor's degree in graphic design and a master's degree in artistic direction, I am specialized in visual identity, web design and edition. Inspired by simple things and new trends, I adapt my style to many fields : fashion, cbd, music, art and more.

I love to ask questions, connect the dots between things, and develop concepts and visuals that resonate with others. My goal is always to create things that intrigue, challenge and sometimes just look beautiful. Each project involves the creation of a unique mindset, and innovating with intelligence and simplicity is the key to achieve this. My curiosity for life drives my work, and I've always believed that there is beauty in everything, specially in the details.

I'm curently working as freelance in France and internationally. I am open to new project and job opportunities.
